

JOHN O'GROATS TO LANDS END SPONSORED CYCLE RIDE

OVER 1,000 MILES IN 9 DAYS - JULY 4TH TO JULY 12TH 2013

This is Jake Michael Evans, he has a condition called cerebral palsy. Jake suffered some brain damage as a result of being born prematurely and this has made a massive impact on his little life so far. Jake cannot walk or stand, he gets around by commando crawling and using his K walker.

An operation is available in the UK called SDR (selective dorsal rhizotomy) and although this procedure will not cure Jake's cerebral palsy it could be the difference between Jake walking independently or using a wheelchair for the rest of his life.

YOUR DONATION CAN HELP CHANGE A LITTLE BOYS LIFE AND GIVE HIM INDEPENDENCE AND FREEDOM

We are cycling over 1,000 miles in 9 days from July 4th to July 12th 2013 to help raise money for Jake's operation. His family have raised nearly £27,000 so far and we would love to help them achieve their goal of £50,000.
